Main switch assembly kit, handle black, size 2

Part no. NZM2-XHB Catalog No. 266627

EL-Nummer (Norway)

4315576

Delivery program

Equipment supplied	Door coupling rotary handle with rotary drive
-4-1-1	NZMXV4 extension shaft
	External warning plate/marking plate in German/English Black and yellow lightning symbol
Draduation	Accessories
Product range	
Accessories	Main switch assembly kit
Standard/Approval	UL/CSA, IEC
Construction size	NZM2
Description	Kit for use as a main switch
Function	With black door coupling rotary handle
Protection class	IP66 UL/CSA Type 4X, Type 12
Locking facility	lockable on the 0 position on the handle using up to 3 padlocks can also be modified in 1 position
	With door interlock
Door interlock	Door interlock on OFF with max. 3 padlocks
	can also be modified in I position After the door interlock is activated, must not be opened while on ON or TRIP. Must
	only be opened on OFF
	Can be modified such that it can be defeated from the outside using a screwdriver Not defeated in the locked OFF position.
	Can only be switched ON when the door is closed
Project planning information	External warning plate/designation label can be clipped on.
	For enhanced busbar tag shroud on the incomer side, please order IP2X protection against contact with a finger.
For use with	NZM2(-4)
	PN2(-4), N(S)2(-4)

Design verification as per IEC/EN 61439

2001911 101111011101110111011101110111011	
IEC/EN 61439 design verification	
10.2 Strength of materials and parts	
10.2.2 Corrosion resistance	Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures	Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat	Meets the product standard's requirements.
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects	Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation	Meets the product standard's requirements.
10.2.5 Lifting	Does not apply, since the entire switchgear needs to be evaluated.
10.2.6 Mechanical impact	Does not apply, since the entire switchgear needs to be evaluated.
10.2.7 Inscriptions	Meets the product standard's requirements.
10.3 Degree of protection of ASSEMBLIES	Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distances	Meets the product standard's requirements.
10.5 Protection against electric shock	Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components	Does not apply, since the entire switchgear needs to be evaluated.
10.7 Internal electrical circuits and connections	Is the panel builder's responsibility.
10.8 Connections for external conductors	Is the panel builder's responsibility.
10.9 Insulation properties	
10.9.2 Power-frequency electric strength	Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage	Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material	Is the panel builder's responsibility.

10.10 Temperature rise	The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.12 Electromagnetic compatibility	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function	The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.
