WHO WE ARE

Specialists in Electrical Supplies and Solutions

We are a team with decades of experience and technical expertise in the industrial and commercial sectors. We offer a world-class range of products at the most competitive prices. Our quick turnaround time, and after-hours breakdown support, makes us your preferred electrical service provider. Let our technical team support you in finding the right solution to keep your operation running smoothly & efficiently.

Our Added Value

- Partnerships with leading local and international brands
- Well-trained staff, enabling us to give advice that you can trust
- Substantial stock holding at all branches
- Around-the-clock, technical support (**breakdowns and shutdowns**)

ELECTRICAL

In today's world of ever-changing technology, industry is challenged with keeping abreast of these developments. We are passionate about staying ahead of advances in technology and electrical equipment, ensuring that we are always able to find the best solution for your application.

Electrical

Switchgear | Automation | Cable & Wiring | Contracting Ranges

We can supply you exactly what you need, or support you in finding the right electrical solution. Our expertly-trained sales teams will provide you with quick and reliable service. By employing the latest technology, we find ways to improve your operation's efficiency whilst saving you money. Your facility will operate smoothly, backed by our range of quality, affordable electrical supplies.

- Switchgear
- Automation
- Cable and Wiring Accessories
- Contracting
- Renewable Components
- Solar
- Panel Manufacturing
- Installations and Terminations

METERING

Metering

Onsite Metering | Thermal Imaging Services | Energy Measurement | Detailed Reporting

Let us help you understand exactly how, when, and where your facility is using energy. An audit of your site may uncover electrical issues and identify energy wastage.

We will also identify Power Quality problems and recommend solutions such as Power Factor Correction, Harmonic Filtering and Surge Protection. Our comprehensive audit report will suggest opportunities to reduce energy usage, eliminate energy wastage and achieve financial savings.

Our wide range of products and services offers the flexibility to provide you with a customized solution that is both cost-effective and efficient to your operation:

- Temporary or permanent monitoring
- Class A Meters with highest accuracy recordings
- Remote system software or central server access
- Load analysis
- Load capacity studies
- Bill verification
- Optimisation of existing infrastructure
- Analysis and preparations for curtailment initiatives
- Power quality monitoring and analysis
- Energy metering
- Web based monitoring
- Thermal imaging
- Electrical compliance auditing
- Power factor correction and harmonic filters
- Back-up Power (UPS & Generators)

FLUKE®

LIGHTING

Lighting

Onsite Audits | Lighting Design | Lighting Supplies | Installation & Commissioning

The global movement towards LED technology in recent years has been a drastic one, and as a result, we understand how overwhelming product selection can be. Our partnerships with leading lighting brands ensures that we are well trained and able to provide reliable technical support. We can be trusted to find the right lighting solution for your facility.

- Indoor and Outdoor
- Emergency
- Hazardous Area
- Control Systems
